QUALITY POLICY

The Directors of Bedrock Drilling have established this Quality Policy as the primary quality statement for the company. Bedrock Drilling operates a Quality Management System which is accredited to ISO 9001:2015

Satisfying stakeholder expectations, operational integrity and full compliance with applicable statutory and regulatory requirements are all fundamental to our continued business.

Bedrock Drilling is fully committed to the delivery of high value, high quality services and to continually measuring and improving performance in all aspects of our business.

This Policy provides a clear Purpose and Vision for Bedrock Drilling.

Our Purpose is to provide a high quality service across all projects to ensure client satisfaction both technically and commercially.
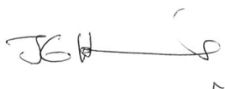

Our Vision is to be the very best provider of drilling consultancy and wells management services. To drive

our Purpose and deliver our Vision, the following Quality Elements are vital:

- Customer Satisfaction
- Value for Money
- Personnel Performance and Satisfaction
- Compliance with company and client policies & procedures and regulatory requirements
- Operational Integrity, Safety and Environmental Protection
- Rigorous document control (revisions, approvals and storage)
- Continuous Measurement and Improvement of Performance
- Revenue and Profit
- Business Development and Growth

To ensure continuous delivery of quality, the company will:

- Ensure that the above elements are considered when developing the company's Annual Business Plan and when establishing Key Performance Indicators (KPIs)
- Maintain ISO 9001:2015 Quality Management System accreditation.
- Prepare project-specific Quality Plans with our Clients, as required, in accordance with ISO 10005:2018 Guidelines for Quality Plans.

The Directors expect all Bedrock Staff and Sub-contractors to implement the requirements of the Bedrock Drilling Quality Management System fully and without exception.
