

BEDROCK DRILLING HEALTH AND SAFETY POLICY

In the conduct of all its activities, Bedrock Drilling will endeavour to comply with the highest international and local standards of Health and Safety legislation. The health, safety, security and welfare of all personnel involved and of the general public will be of the highest priority.

To achieve this, the Company will:

- Identify protection of Health and Safety as a management priority.
- Develop a culture of Health and Safety observance throughout the Company and ensure that all employees and those involved in our activities understand and share their responsibilities.
- Regularly review and audit all activities to ensure that Health, Safety and Security procedures are appropriate and complied with and any shortfalls or non-compliance are swiftly rectified.
- Ensure our management system is focused to identify, assess and mitigate risk to Health and Safety in all activities, with the objective of eliminating the potential for injury to personnel and damage to assets.
- Ensure our contractors have an established safety management system and a record of health protection and prevention of accidents.
- Make Health and Safety records available to the appropriate authorities or the public where required.
